NUOSEN CUSTOM CABINETRY

Company Profile | Completed Cabinetry

Project Spaces | Built-in Storage | Custom Furniture

Residential | Apartment | Hospitality | Commercial

Guangzhou, China

01 Custom cabinetry shaped around your project

Designed for refined interiors. Prepared for project delivery.

Based in Guangzhou, NUOSEN supplies custom cabinetry, built-in storage and project furniture for residential and commercial interiors.

We work from drawings, dimensions and material requirements to coordinate furniture packages for apartments, hotels and commercial projects.

Furniture planned to fit the space and the way it is used.

Better fit, cleaner storage and a more consistent interior.

02 Cabinetry, storage and built-in furniture

Custom products prepared around layouts, dimensions and project requirements

Kitchen & Dining

Kitchens, pantries, dining units

Bedroom Storage

Wardrobes, beds and desks

Wall Panels & Built-ins

TV walls, displays and storage

03 Completed Residential Cabinetry

Selected cabinetry projects completed by NUOSEN

04 Display Cabinetry

Three-sided display storage with integrated lighting

05 Kitchen Cabinetry

Tall units, wall cabinets, base cabinets and island storage

06 Dining Storage

Full-height cabinetry fitted along the dining wall

07 Dining Display Cabinetry

Lit glass display cabinetry beside the dining area

08 Study Storage

Full-height storage and a compact built-in desk

09 Media Wall Cabinetry

TV wall storage, a wood-grain tall cabinet and lower drawers

10

Make every square metre work harder

Smarter storage for compact and high-use spaces

Coordinate wardrobes, desks, storage beds, TV units and wall panels around the room—not around standard furniture sizes.

A planned system improves capacity, circulation and daily use while keeping the interior visually consistent.

Wardrobes | Desks | Storage beds | TV units | Wall panels

Built around room dimensions and project requirements

11 More finish choices, more confidence

A broad colour and material library supports accurate design decisions

Compare wood grains, stone textures, soft-touch finishes, gloss, matt and metallic colours before ordering.

Early material confirmation helps align colour, texture and overall matching with the intended interior.

12

Production support for custom orders

Prepared from drawings, materials and detail requirements

Drawing Review

Prepared from approved information

Material Prep

Finishes and components organised

Detail Checking

Key details reviewed before packing

Reliable results begin with disciplined preparation.

Drawings, materials, production details and packing are coordinated for the next project stage.

13 Protected packaging for safer delivery

Protection selected by product size and transport risk

Panels, doors and worktops are packed separately with surface and edge protection. Large or fragile items can be reinforced with wooden frames to reduce handling and transport risk.

Packaging is prepared according to size, weight and vulnerability, helping site teams receive and sort items more efficiently.

Packing matched to product type

Clearer protection helps reduce avoidable damage before products reach the site.

14 From drawings to a furniture package

A clear starting point for project discussion

01

Drawings

Floor plans / layouts

02

Dimensions

Confirmed room sizes

03

Product List

Furniture list / BOQ

04

Materials

Finish and hardware

05

Scope

Package review

Share your project information to organise the cabinetry scope.

For quotation review: drawings, dimensions, quantities, materials and hardware requirements.
